# Mean Dataset Correlation Report

Run: full_run_20260617

Each handwriting dataset gets its own Pearson correlation matrix across PLL, WER, CER, and Levenshtein. The final table is the elementwise mean of those dataset-level matrices, so every handwriting style has equal weight.

| Variant | Datasets | PLL-WER | PLL-CER | PLL-Lev |
|---|---|---|---|---|
| base_valid_all_pages | 17 | 0.408 | 0.426 | 0.499 |
| base_valid_after_worst20_t | 11 | 0.605 | 0.640 | 0.697 |
| high_confidence_after_worst2 | 11 | 0.461 | 0.496 | 0.565 |

# base_valid_after_worst20_trim: mean of per-dataset correlations

## Mean correlation matrix

| | PLL | WER | CER | Levenshtein |
|---|---|---|---|---|
| PLL | 1.000 | 0.605 | 0.640 | 0.697 |
| WER | 0.605 | 1.000 | 0.809 | 0.792 |
| CER | 0.640 | 0.809 | 1.000 | 0.951 |
| Levenshtein | 0.697 | 0.792 | 0.951 | 1.000 |

## Dataset counts per cell

| | PLL | WER | CER | Levenshtein |
|---|---|---|---|---|
| PLL | 11 | 11 | 11 | 11 |
| WER | 11 | 11 | 11 | 11 |
| CER | 11 | 11 | 11 | 11 |
| Levenshtein | 11 | 11 | 11 | 11 |

# base_valid_all_pages: mean of per-dataset correlations

## Mean correlation matrix

| | PLL | WER | CER | Levenshtein |
|---|---|---|---|---|
| PLL | 1.000 | 0.408 | 0.426 | 0.499 |
| WER | 0.408 | 1.000 | 0.720 | 0.670 |
| CER | 0.426 | 0.720 | 1.000 | 0.954 |
| Levenshtein | 0.499 | 0.670 | 0.954 | 1.000 |

## Dataset counts per cell

| | PLL | WER | CER | Levenshtein |
|---|---|---|---|---|
| PLL | 17 | 17 | 17 | 17 |
| WER | 17 | 17 | 17 | 17 |
| CER | 17 | 17 | 17 | 17 |
| Levenshtein | 17 | 17 | 17 | 17 |

# high_confidence_after_worst20_trim: mean of per-dataset correlations

## Mean correlation matrix

| | PLL | WER | CER | Levenshtein |
|---|---|---|---|---|
| PLL | 1.000 | 0.461 | 0.496 | 0.565 |
| WER | 0.461 | 1.000 | 0.785 | 0.787 |
| CER | 0.496 | 0.785 | 1.000 | 0.863 |
| Levenshtein | 0.565 | 0.787 | 0.863 | 1.000 |

## Dataset counts per cell

| | PLL | WER | CER | Levenshtein |
|---|---|---|---|---|
| PLL | 11 | 11 | 11 | 11 |
| WER | 11 | 11 | 11 | 11 |
| CER | 11 | 11 | 11 | 11 |
| Levenshtein | 11 | 11 | 11 | 11 |
