

Per-Handwriting Correlation Report

Run: full_run_20260617

This report shows Pearson correlation matrices between PLL, WER, CER, and Levenshtein for each handwriting set. The main tables use the current worst-20% page trim where available, so pages suspected of broken ground truth do not drive the per-handwriting summary.

Metric	Value
Handwriting sets	20
Source rows	658
Base-valid rows	351
Report variants	3

PLL Correlation by Handwriting

Handwriting	Pages	Rows	PLL-WER	PLL-CER	PLL-Lev
Vatican 44 Amitai Midrash Tanchuma	2	14	0.980	0.904	0.914
BNF 150 test 2	2	14	0.921	0.767	0.762
BNF 150 Amitai Tanchuma 2	3	21	0.909	0.736	0.734
Sefer Haikarim BNF 740 experiment	2	14	0.876	0.915	0.913
